

FINAL TYPICAL SECTIONS

TYPICAL 4-LANE DIVIDED SECTION

TYPICAL 3-LANE SECTION W/CENTER TURN LANE

Located in the City of Bellevue in Sarpy County, Nebraska, the proposed project consists of making roadway improvements to the 36th Street corridor between Bline Avenue and Platteview Road. Currently, 36th Street is a four-lane roadway from its intersection with N-370 south to Bline Avenue, where it tapers back to a two-lane roadway and remains two-lane to Platteview Road.

The purpose of this project is to improve local traffic operations along 36th Street between Bline Avenue and Platteview Road to facilitate the safe and efficient movement of existing traffic, and to accommodate future traffic volumes and travel demands along the 36th Street corridor. The proposed project would provide a safe and efficient transportation facility for local and regional commuters by reducing delays associated with congestion and improving safety.

The project will be broken into two phases. Phase 1 will cover Bline Avenue to Sheridan Road. Phase 2 will follow, continuing south to Platteview Road.

PROJECT SCHEDULE & NEXT STEPS

October 10, 2017	NEPA (Environmental Study document submitted and approved)
Spring-Fall 2018	Final Design of Phase 1
Fall 2018 - Summer 2019	Right-of-Way
Winter 2019-2021	Construction of Phase 1
Anticipated 2023-2025	Construction of Phase 2 (Funding Dependent)
